RE: MESF Update
Date: June 22, 2017

MESF has been officially notified of the awarding of a grant for \$150,000 from the Physicians Foundation. The grant is for a further extension of our work in the area of Leadership Development. MSSNY has received an initial \$75,000 to begin the program.

MESF will recast the previous program to place more emphasis on practical leadership tools for physicians already in leadership positions in hospital and major group organizations. It is expected that we will continue with the Friday evening through Saturday afternoon seminar format and are currently working with venues in Albany and Rochester. The costs of physician participation in these programs will be covered by the grant.

In addition, the grant has been designed to cover a series of instructional videos focused on various aspects of leadership. Jon Chilingirian, PhD of Brandeis University will again be the program leader.

In addition to the Leadership Development program, MESF is working with Terry Bedient of CPH and MSSNY staff to identify funding for a program focused on Physician Wellness.
