TO: MSSNY 2018 House of Delegates

FROM: Malcolm Reid, MD

DATE: March 25, 2018

=====

It is my pleasure to report on the activities of the Medical Educational and Scientific Foundation, the 501-c-3 subsidiary of the Medical Society of the State of New York.

Our key focus has been on the development of leadership skills for physicians in New York State who are rising to leadership positions in their county societies, specialty societies, group practices or hospital organizations.

Our first major program was run on October 13-14 in Albany and attracted more than 40 attendees. Under the direction of Jon Chilingirian PhD from Brandeis University, the program focused on key elements of leadership and strategic analysis for physicians in leadership roles. Because of the interactive nature of the program we are limited to 40 attendees. There is no charge. Hotel, meals and transportation are covered under a grant from the Physicians Foundation. Both MSSNY members and nonmembers are invited. (Comments from attendees are attached.)

This program will be repeated here in Buffalo on April 13-14. There are still a limited number of seats available for the Buffalo seminar. See Tom Donoghue for information of contact him on his cell phone at 516-672-3625. In addition, MESF has been in negotiation with a major cardiology society for the development of a multi-part educational program for physicians in India. This will be similar to the program MESF executed four years ago with Johns Hopkins. When contracts are completed MESF will move on to the collaborative development of a multimedia program in the area of diabetes.
