

# **County Federation Report**

Executive Representative

November 5, 2020

Aaron Kumar, MD, MBA, Executive Director (Suffolk)

- “Delegated Credentialing” conversations with the State Board, MSSNY, the County Federation, and a hospital system, are underway. Several details in quality, workflow, legal stipulations, participation, uniformity, and background processing are being analyzed. Without the Counties continued role in credentialing, the operational viability of many Counties will be in jeopardy, in turn affecting MSSNY strength. Alternative options and possible collaborative expansion of scope and resources are being discussed.
  
- With the MSSNY membership committee, the Federation will be evaluating direct member engagement options by County executive and board members. Additionally, we look forward to a new enhanced and concise membership interaction packet, with updated and uniform information from MSSNY, that all the Counties can use to supplement their recruitment and retention efforts.
