

Nassau County Medical Society

Councilor's Report – November 5, 2020

Paul Pipia, MD, Councilor

1. The new location of The Nassau County Medical Society and The Nassau Academy of Medicine has been finalized. There will be a ribbon-cutting ceremony on a date TBD and notices will go out on our new information.
2. Our new Nassau County Medical Society App has shown a 29% growth and has increased our visibility not only locally but also nationally.
3. We have two webinars in the month of November. The 1st one was on November 3, 2020 at 7:30am. The topic is “TBI in Returning Veterans” and the speaker is our President Elect for the Society, Dr. David Podwall. The 2nd one is on November 18, 2020 at 6pm. The topic is “Vaccines – What You Need to Know” and our guest speaker is the Chair of the Infectious Disease Department of both LIJ and North Shore, Dr. Bruce Farber.
4. The Executive Director is updating our membership database. The goal is to create a living document that will have the most up to date information. We also now can accept online payments through our website.
5. The Executive Director has been reaching out to various villages in our county to see how our members can be of service to the community as subject matter experts. So far we have been in communication with three and working on how we can partner.
6. Our President's Gala has, once again, been moved to sometime in the Spring due to the COVID-19 pandemic.
